About EGI

EGI is a federation of providers delivering advanced computing, data, and digital services for research and innovation, while driving collaborative development and impact across scientific communities.

The EGI Federation brings together national and international service providers to deliver the computing and data services that research teams rely on across Europe. Working as a coordinated federation, EGI enables research communities to access advanced capabilities in computing, data analytics, and artificial intelligence, while also supporting research and development that pushes the frontiers of digital innovation for science.

Through this collaborative model, EGI helps its members transform emerging technologies and approaches, such as big data, cloud computing, artificial intelligence, digital twins, and FAIR data, into reliable, environmentally and financially sustainable services for research and education. These services are designed to ensure continuity and stability beyond individual projects, enabling scientific communities

across disciplines, countries, and funding cycles to benefit from ongoing digital innovation. At the same time, the federated infrastructure and its associated R&D activities generate impact across all fields of science, from physics to the humanities, fostering new discoveries and novel research approaches.

Coordinated by the EGI Foundation, the Federation operates through a shared IT platform that connects hundreds of providers with research groups across Europe and beyond. By aligning and aggregating national capacities with European and global priorities, EGI ensures that researchers can seamlessly access digital resources and expert support. Together, EGI and its members establish a strong and lasting foundation for open, collaborative, and data-intensive science, strengthening Europe's capacity for research and innovation.

Council Participant GRNET_

About GRNET

GRNET – National Infrastructures for Research and Technology, is one of the largest public sector technology companies in Greece. Since August 2019, it operates under the auspices of the Ministry of Digital Governance.

GRNET provides networking, cloud computing, HPC, data management services and e-Infrastructures and services to academic and research institutions, to educational bodies at all levels, and to all agencies of the public sector.

GRNET holds a key role as the coordinator of all e-infrastructures in Education and Research. It is responsible for promoting and disseminating network and computing technologies and applications, as well as for promoting and implementing Greece's Digital Transformation goals and policy.

GRNET leverages the national educational and research activity, striving towards the development of applied and technological research in the fields of telecommunication networks and computing services. It designs, develops and maintains advanced computer & networking infrastructures and services, data centers, a nation-wide fiber optic network and a high-performance computer system (HPC-ARIS).

GRNET also coordinates and participates in Open Science projects, and is involved in the formulation of the National Artificial Intelligence Strategy.

It is the Euro QCI (Quantum Communication Infrastructure) national representative. GRNET provides international interconnection through the pan-European GÉANT network, and is the National Research and Education Network (NREN).

Overall EGI Impact_

The EGI Federation is composed of e-infrastructure providers from national and community initiatives, forming one of the largest distributed computing infrastructures for researchers in the world, integrating about 1,243,400 CPU cores and over 1,4 Exabyte of storage space from hundreds of data centres.

In 2025, the EGI Federation served around 150,000 users (+29%). EGI users consumed 8 Billion HTC CPU hours (+8%), 43 Million Cloud CPU hours (-19%), ran over 351 Million computational jobs (-12%) and published over 2,300 open access publications.

As of the previous year, the research community with the largest number of users is Medical and Health Sciences, while the community with most extensive HTC CPU/h consumption is CMS.

From the scientific communities engaged in 2025, the one with most extensive Cloud CPU/h consumption is WeNMR.

Moreover, EGI engaged with 219 scientific communities, including SMEs and business pilots, and 41 Research Infrastructures

EGI Contribution to Excellence in Science in the Greece

GRNET Consortium coordinates the Greek participation to the EGI Federation, representing the National grid initiative for Greece. GRNET Consortium promotes the building and operation of a multidisciplinary national Distributed Computing Infrastructure open to all sciences and to developing countries in Greece. This report provides an overview of the activities of GRNET Consortium in EGI, and the impact that was achieved thanks to this participation. The annual membership fee contributed by SURF to the EGI Foundation in 2025 was 46,000 EUR.

EGI federates hundreds of resource centres that are located at participant countries, organizations and at collaborating e-Infrastructures worldwide. This federated infrastructure supports data- and compute-intensive research across Europe and the world. In 2025, our federation has been accessed by over 150,000 users.

Research Infrastructures and multi-national research collaborations are the largest adopters of EGI Services, the main contributors of thematic portals, and operate community-specific compute, storage and data systems based on EGI federation capabilities.

The services of the EGI federation have been used by 3,120 researchers from Greece over the year. The estimated annual scientific output produced by research communities, projects and scientific collaborations from the Netherlands and supported by the EGI Federation in 2025 is estimated to amount to over 1,560 peer reviewed scientific publications. The EGI Federation is currently working with almost 50 Research Infrastructures, 13 of which include Greek partners. These EGI-enabled research infrastructures, their Greek members and their scientific output (publications) are detailed in the following pages of the report.

Greek Research Collaborations in EGI

ALICE (High Energy Physics)

- National and Kapodistrian University of Athens

EGI Supported Activities and Services

ALICE has been supported since 2012 as part of the EGI – WLCG collaboration. Federated services delivered include:

- Software support
- Infrastructure and Operations Services (infrastructure

- catalogue, Software Distribution Services (UMC, CMD, operations documentation)
- Operations Coordination (middleware deployment campaigns, procedures, innovation of tools)

- Security Services and Activities (CSIRT, Software vulnerability group, international security coordination, policies, IGTF distribution)

43 SCIENTIFIC PAPER(S) PUBLISHED IN 2025

Greek Research Collaborations in EGI

ATLAS (High Energy Physics)

- NCSR Demokritos
- National and Kapodistrian University of Athens
- Aristotle University of Thessaloniki
- National Technical University of Athens

EGI Supported Activities and Services

ATLAS has been supported since 2012 as part of the EGI – WLCG collaboration. Federated services delivered include:

- Software support
- Infrastructure and Operations Services (infrastructure catalogue,

- Software Distribution Services (UMC, CMD, operations documentation)
- Operations Coordination (middleware deployment campaigns, procedures, innovation of tools)
- Security Services

- and Activities (CSIRT, Software vulnerability group, international security coordination, policies, IGTF distribution)

74 SCIENTIFIC PAPER(S) PUBLISHED IN 2025

Greek Research Collaborations in EGI

CLARIN (Linguistics)

- clarin:el
- ILSP-ATHENA Research Center

EGI Supported Activities and Services

CLARIN thematic services has been supported by EGI since 2018. CLARIN has a Service Level Agreement with EGI, using the following services:

- EGI Cloud (Compute + Online Storage) for hosting the Virtual Language Observatory

- (VLO)
- Technical support
- Service integration

0 SCIENTIFIC PAPER(S) PUBLISHED IN 2025

Greek Research Collaborations in EGI

CMS (High Energy Physics)

- University of Ioánnina
- NCSR Demokritos
- National Technical University of Athens
- National and Kapodistrian University of Athens

EGI Supported Activities and Services

CMS has been supported since 2012 as part of the EGI – WLCG collaboration. EGI Federated services delivered include:

- Software support (consultancy to users and system administrators, (software maintenance and validation)
- Infrastructure and

- operations Services (infrastructure catalogue, accounting repository and portal, helpdesk, monitoring, operations portal, AAI)
- Software distribution services (UMC, CMD, operations documentation)
- Operations coordination (middleware deployment campaigns, procedures,

- innovation of tools)
- Security services and activities (CSIRT, Software vulnerability group, international security coordination, policies, IGTF distribution)

135 SCIENTIFIC PAPER(S) PUBLISHED IN 2025

Greek Research Collaborations in EGI CTA (Astronomy) - National and Kapodestrian University of Athens - National Technical University of Athens - Aristotle University, Thessaloniki	EGI Supported Activities and Services The CTA experiment has been using compute resources from EGI partners for more than a decade. The services from the EGI federation that CTA uses include: EGI HTC services from 9 EGI participant countries (CZ, DE, IT,	- FR, ES, NL, RO, PT, SI) - Software distribution services (UMC, CMD, operations documentation) - Operations coordination (middleware deployment campaigns, procedures, innovation of tools) - Security services and activities (CSIRT,	Software vulnerability group, international security coordination, policies, IGTF distribution) 0 SCIENTIFIC PAPER(S) PUBLISHED IN 2025
---	--	--	---

Greek Research Collaborations in EGI DUNE (Astroparticle Physics) National and Kapodistrian University of Athens	EGI Supported Activities and Services The DUNE experiment has been using compute resources from EGI partners for more than a decade. The services from the EGI federation that DUNE uses include: EGI HTC services from 6 EGI participant countries (CH, CZ, ES, FR, NL, UK)	- Software distribution services (UMC, CMD, operations documentation) - Operations coordination (middleware deployment campaigns, procedures, innovation of tools) - Security services and activities (CSIRT, Software	vulnerability group, international security coordination, policies, IGTF distribution) 41 SCIENTIFIC PAPER(S) PUBLISHED IN 2025
---	--	--	---

Greek Research Collaborations in EGI ELI-NP (Nuclear Physics) Hellenic Mediterranean University	EGI Supported Activities And Services ELI works with EGI since 2016 on exploring and validating approaches for off-site computing and data management. ELI-NP setup a High Throughput Compute Service on EGI resources and works with EGI providers on	- Refining the user requirements and translating these to e-infrastructure requirements, and - Identifying and validating services from EGI that can be relevant for ELI (besides HTC and compute).	Mobilising already existing HTC compute, cloud compute and storage resources from EGI for ELI piloting and demonstration activities. 90 SCIENTIFIC PAPER(S) PUBLISHED IN 2025
--	--	--	--

Greek Research Collaborations in EGI EMSO (Oceanography) HCMR	EGI Supported Activities And Services The collaboration with EGI started back in 2017 when 4 cloud providers of the EGI Federation agreed to support the EMSODEV project during the design and implementation of the EMSODEV Data Portal. EMSO-ERIC set up the EMSO ERIC Data	Management Platform on the EGI providers in order to harmonise the data sets following Oceansites specifications, FAIR principles, and EOSC guidelines.	0 SCIENTIFIC PAPER(S) PUBLISHED IN 2025
--	---	---	--

Greek Research Collaborations in EGI EMPHASIS (Agricultural Sciences) Mediterranean Agronomic Institute of Chania	EGI Supported Activities And Services EMPHASIS has been supported through the establishment of a Data Space in the EGI-ACE project. Since 2017 EMPHASIS using the following services from EGI: EGI Check-in	- EGI Cloud Compute - EGI Online Storage - EGI DataHub - Technical support - Software integration and piloting)	0 SCIENTIFIC PAPER(S) PUBLISHED IN 2025
--	---	---	--

Greek Research Collaborations in EGI KM3NET (Neutrino Observatory) - Aristotle University Thessaloniki - Hellenic Open University - NCSR Demokritos - National and Kapodistrian University of Athens	EGI Supported Activities and Services The Km3Net experiment has been using compute resources from EGI partners since 2013. The services from the EGI federation that Km3Net uses include: EGI HTC services from 2 EGI federated sites from IT and PL	- Software distribution services (UMC, CMD, operations documentation) - Operations coordination (middleware deployment campaigns, procedures, innovation of tools) - Security services and activities (CSIRT,	Software vulnerability group, international security coordination, policies, IGTF distribution) 52 SCIENTIFIC PAPER(S) PUBLISHED IN 2025
--	--	---	--

Greek Research Collaborations in EGI LifeWatch (Biodiversity and Ecosystem Research) - IMBBCC 49 partner institutions covering a wide range of scientific disciplines (terrestrial, marine and freshwater biology, zoology, botany, geography, forestry, agriculture, genetics,	biotechnology, pharmacy, aquaculture, education and law) EGI Supported Activities and Services The LifeWatch experiment has been using compute resources from EGI partners since 2018. The services from the EGI federation that LifeWatch	- uses include: - EGI Cloud services from 2 EGI federated sites from ES and PT - Software distribution services (UMC, CMD, operations documentation) - Operations coordination (middleware deployment campaigns, procedures,	- innovation of tools) - Security services and activities (CSIRT, Software vulnerability group, international security coordination, policies, IGTF distribution) 0 SCIENTIFIC PAPER(S) PUBLISHED IN 2025
---	---	---	---

Greek Research Collaborations in EGI MOEDAL-MAPP (Physical Sciences) Technical University of Athens	EGI Supported Activities and Services MOEDAL-MAP has been supported since 2016 as part of the EGI - WLCG collaboration. EGI Federated services delivered include: - Software support - Infrastructure and operations Services (infrastructure catalogue, accounting	- repository and portal, helpdesk, monitoring, operations portal, AAI) - Software distribution services (UMC, CMD, operations documentation) - Operations coordination (middleware deployment campaigns, procedures, innovation of tools) - Security services and	activities (CSIRT, Software vulnerability group, international security coordination, policies, IGTF distribution)urces. 23 SCIENTIFIC PAPER(S) PUBLISHED IN 2025
--	---	--	---

Greek Research Collaborations in EGI

WeNMR (Structural Biology)

- University of Athens
- NCSR Demokritos
- BSRC Alexander Fleming
- Aristotle University of Thessaloniki
- University of Patras
- University of West Attica

EGI Supported Activities and Services

ThWeNMR is supported by EGI since 2011 and has a Service Level Agreement since 2016. The EGI Services used by the community include:

- High-Throughput, Cloud + Online

Storage services from 23 EGI federated sites from NL, IT, FR, DE, PL, UK, the Asia Pacific region, IberGrid (Spain and Portugal), the Latin America region.

- EGI Workload Manager
- Trust and identity management with Check-in

10 SCIENTIFIC PAPER(S)
PUBLISHED IN 2025

Service Level Agreements

During 2025, GRNET supported 36 Service Level Agreements for international scientific communities via EGI, delivering AAI services.

Participated Projects

In the reference period, the EGI Foundation was leading seven Horizon Europe Projects, two of which started in 2025:

- iMagine (September 2022–December 2025)
- interTwin (September 2022–August 2025)
- ENVRI-Hub NEXT (February 2024–January 2027)
- EOSC Beyond (April 2024–March 2027)
- EOSC Data Commons (April 2025–March 2028)
- RI-SCALE (March 2025–February 2028)

- SPECTRUM (January 2024–June 2026)

Furthermore, the EGI Federation was involved in 6 additional projects, increasing the innovation potential of its participants.

The EGI Federation participates in Horizon 2020 and Horizon Europe projects together with Dutch institutions to facilitate the uptake and use of e-infrastructure services for science. A summary of these projects, the involved institutes and the scope of the collaboration is provided in the next table.

Project Title

Scope of Collaboration

EGI contributes research and development expertise to the architectural design and implementation of open, distributed software infrastructure for AI4Europe. This ensures the platform evolves as a scalable,

interoperable ecosystem. EGI also applies its deep knowledge of physical resources, usability, distributed systems, and emerging technologies to develop deployment mechanisms for AI tools across private and public cloud and HPC resources.

Participating beneficiaries from the country

- NCSR Demokritos
- Aristotle University of Thessaloniki

Project Title

Scope of Collaboration

EGI advances the development of innovative approaches for communication, dissemination, and exploitation management. It contributes technical expertise to the definition of the project's architecture and guidance

framework, supports the harmonisation of trust and interoperability policies, and participates in the validation process. EGI also contributes to the preparation of the Compendium and to formulating recommendations that inform the project's future directions..

Participating beneficiaries from the country

- GRNET

Project Title

Scope of Collaboration

EGI leads the research on Blue-Cloud VRE interaction with EOSC projects (WP5) and contributes technical expertise across multiple tasks. This includes developing and deploying sub-setting services at BDIs and BlueCloud Data Lakes (T2.3), tuning

data lakes with DTO developments (T2.4), evolving common VRE services (T5.1), federating multiple e-infrastructures (T5.2), ensuring EOSC core service interoperability (T5.4), and supporting communication, community dialogue, and exploitation planning (T6.1, T7.1, T7.2)..

Participating beneficiaries from the country

- GRNET
- Foundation for Research and Technology – Hellas (FORTH)
- Hellenic Centre for Marine Research

Project Title

Scope of Collaboration

EGI coordinates the research and implementation of federated Single Sign-On access through its EGI Check-in service, enhancing secure and interoperable authentication across the project ecosystem.

Participating beneficiaries from the country

- OpenAIRE AMKE

Project Title 	Scope of Collaboration EGI contributes to developing a detailed technical roadmap, conducting state-of-the-art analysis, and designing a modular architecture framework for data monetization. It supports the definition of KPIs for fair dataset	valuation, business cases for data sharing platforms, and pilots for framework deployment. EGI also advances non-monetary data value dimensions, validation testing, standardization activities, and coordination with the Data Spaces Support Centre.	Participating beneficiaries from the country - CERTH - ICCS - OTE - Diacheiristitis Ellenikou Diktyou Dianomis Elektrikis Energeias AE
---	--	--	--

Project Title 	Scope of Collaboration EGI supports the research and integration of datasets, tools, and workflows from diverse sources into ECHOES's technical framework. It provides scalable, secure storage and compute infrastructure, alongside a federated authentication and authorisation infrastructure (AAI) for	seamless cloud access. EGI also contributes expertise to the project's long-term sustainability and open innovation strategies through private sector engagement.	Participating beneficiaries from the country Foundation for Research and Technology – Hellas (FORTH)
---	---	---	---

Project Title 	Scope of Collaboration EGI contributes multi-faceted research expertise across key work packages, including governance, funding models, and cost structures for EOSC sustainability (WP1). It plays a leading role in inter-project collaboration (WP4/	WP5), coordinating grants, technical alignment, and joint communications among Horizon Europe INFRAEOSC projects. EGI also supports effective project execution and coordination (WP9)..	Participating beneficiaries from the country Athena Research Center
---	---	--	--

Project Title 	Scope of Collaboration EEGI contributes to expanding EOSC EU Node adoption through diverse use cases, cascading grants with EOSC Gravity, and roadmap improvements (T2.1). It supports the technical evolution and validation of the EOSC	Federation's architecture and AAI, delivering prioritised requirements and technical guidelines (T3.4). Minor contributions include synergies with Data Spaces (T4.3) and technical project management (T5.1).	Participating beneficiaries from the country OpenAIRE AMKE
---	---	--	---

Project Title 	Scope of Collaboration EGI is contributing to the architectural design and implementation of open distributed software to ensure that AI4Europe evolves as a distributed ecosystem. EGI is also providing its expertise on physical resources, usability, development of systems, distributed systems and new	technologies to develop mechanisms for the AI tools to deploy/make use of private/public Cloud and HPC resources.	Participating beneficiaries from the country - Aristotle University of Thessaoloniki - Foundation for Research and Technology – Hellas - Hellenic Cancer Society
---	---	---	---

Project Title 	Scope of Collaboration EGI provides cloud compute and AAI services to enable execution of extended reality (XR) tools, while supporting project communications and stakeholder engagement.	Participating beneficiaries from the country National Technical University of Athens
---	--	---

Project Title 	Scope of Collaboration EGI contributes research expertise to defining requirements, metrics, specifications, and validation pilots for assessing thematic services and platforms.	Participating beneficiaries from the country - Athena Research Center - OpenAIRE AMKE
---	---	---

Project Title 	Scope of Collaboration EGI conducts environmental impact assessments across the EGI Federation and partner ESFRIs, identifying sustainability best practices. It develops environmental metrics publication systems,	energy-aware workflow brokering for HTC/cloud/AI services, and self-assessment questionnaires for Research Infrastructures. EGI also provides training, consultancy, and communications support.	Participating beneficiaries from the country University of Thessaly
---	--	--	--

Project Title	Scope of Collaboration		Participating beneficiaries from the country
	EGI leads communication, dissemination, engagement, and exploitation efforts (WP1), including stakeholder mapping and service catalogue promotion. It develops climate risk training modules and provides access	to training/computing infrastructure (WP3), while contributing to FAIR frameworks, AAI analysis, and access policy alignment for integrated knowledge services (WP6)	• EnviFriendly Innovations P.C. • University of Crete • National Observatory of Athens

Project Title	Scope of Collaboration		Participating beneficiaries from the country
	EGI contributes to developing a data-driven risk prediction model for cognitive decline using big data analysis from cross-sectional and longitudinal datasets across four European clinical centres.		• Idryma Technologias Kai Erevnas

Project Title	Scope of Collaboration		Participating beneficiaries from the country
	EGI supports defining interoperability standards with EOSC and the broader landscape, while leading the design of sustainable services beyond the project lifetime. It delivers a federated cloud environment and EGI	Notebooks for scalable workflow development, data analysis, and sharing within the PITHIA e-science centre.	• Ethniko Asteroskopeio Athinon

Project Title	Scope of Collaboration		Participating beneficiaries from the country
	EEGI leads WP6 on Services Provision, researching unified access policies and a single access point for distributed RI resources. It contributes to financial modelling and business cases (WP3), impact	strategies (WP4), dissemination (WP5), and the Italian central Hub (WP8).	• OpenAIRE AMKE • Athena Research Center

Project Title	Scope of Collaboration		Participating beneficiaries from the country
	EGI leads WP4 on Feasibility Assessment and Roadmap, developing realistic infrastructure upgrade scenarios and cooperation mechanisms documented in the AI in Science Roadmap. As WP8/WP9 lead, it drives communication,	dissemination, engagement, the annual AIS Summit, RAISE Secretariat setup, and stakeholder management	• OpenAIRE AMKE

Project Title	Scope of Collaboration		Participating beneficiaries from the country
	EGI contributes research to gap analysis, user requirements, system specifications, security frameworks, and self-sovereign identity management. It coordinates policy recommendations on distributed infrastructures, secure data exchange,	and Data Spaces, while supporting dissemination activities.	• EXUS AI • University of Thessaly • University of Piraeus Metro

Project Title	Scope of Collaboration		Participating beneficiaries from the country
	EGI advances stakeholder engagement and alignment while leading IT security management and software vulnerability assessment for the UNCAN.eu platform's federated infrastructure. It contributes to infrastructure federation, decentralised health	research environments, and impact assessment guidelines.	• Athena Research Center • Epiteliki Domi ESPA • Ypourgeiou Ygeias • ENOSI ASTHENON ELLADAS • GENIKO ANTIKARKINIKO OGKOLOGIKO • NOSOKOMEIO ATHINON O AGIOS SAVVAS

Infrastructure Contributions

The EGI Federation offers two complementary compute capabilities: the High-Throughput Compute (HTC) federation and the Cloud federation. 5 Greek data centres contribute to these federations:

HTC Federation:

- GR-07-UOI-HEPLAB (HEP Laboratory, Physics Department, University of Ioannina, Greece)
- HG-02-IASA (IASA)
- HG-06-EKT (EKT – NDC)
- GRNET-ARIS

HTC Federation:

- GRNET-OPENSTACK

The data centres provided 5 service endpoints and delivered 426,205 Cloud CPUhours in total to EGI communities over the year. With the help of the EGI Security Vulnerability Group, the Greek sites avoided 49 critical vulnerabilities in foundational software systems during the year.

Methodology

Data for this impact report has been collected from the following sources.

Users

EGI uses the following methodology to capture the number of EGI users who rely on EGI services

- EGI serves users in the form of ‘communities’, called ‘Virtual Organisations’ (VO in short). A VO’s members can range from one to tens of thousands. Members of a VO benefit from and use EGI services in different ways (e.g., by using Services for Federation or Services for Research).
- EGI establishes knowledge about its VOs as part of the user community support lifecycle; therefore, baseline information about VOs is collected through the Customer Relationship Management process (CRM).

At the end of 2025, there were 196 VOs in EGI. EGI Virtual Organisations (VOs) can rely on different technical and non-technical mechanisms to manage

their own members. Depending on their choice, the EGI Federation coordinator (EGI Foundation) has to follow different, corresponding approaches to know the number of members in a given VO, and to obtain additional information about these members (e.g. their ‘country’). The EGI Foundation uses the following mechanisms to obtain information about the VO users:

- Obtain user number statistics from the EGI Operations Portal for VOs, where the members register personally in a ‘VO membership management’ system that is either operated by EGI or can be accessed by EGI.
- Obtain user number statistics from Community VRE REST APIs for VOs that operate Virtual Research Environments (VREs) on top of EGI resources. Those VREs implement a specific API to report users (e.g., WeNMR, Virtual Imaging Platform (VIP), NBIS).
- Obtain user number statistics from interviews with VO coordinators for VOs coordinated by one person.

Publications

Publications are collected from each community’s public repository, if existing. Additional details are checked with the VO coordinators during the interviews to complement this information. EGI also consults OpenAIRE services to countercheck the data. You can check the list of repositories for each VO here (requires login): <https://operations-portal.egi.eu/vo/#collapseVoListOther>.

Institutional members supporting research communities

EGI relies on the information on each community’s website to list institutions supporting research communities at the national level. Additionally, EGI appreciates the feedback from its national representatives to refine and improve those lists.
